## **KLIPSCH INTRODUCES PREMIUM CUSTOM INSTALLATION SPEAKER SOLUTIONS AT CES ASIA 2017**

**SHANGHAI, China (June 7, 2017)** — Klipsch®, a tech-driven audio company, today announces a variety of new high-performance custom installation speaker solutions that will make their debut in China at the CES Asia. Klipsch is introducing professional custom installation and landscape speakers, and amplifiers for professional integrators that are easy to install and give consumers premium acoustic performances.

Professional Series Reference Premiere Architectural speakers are designed exclusively for the professional custom integrators. The all-new high-performance lineup combines the aesthetics of an architectural speaker with the same award-winning acoustics as its Klipsch Reference Premiere home theater component speaker counterparts. The speaker line is made up of five speakers – three in-wall models and two in-celling models that are designed to reproduce legendary horn-loaded Klipsch Reference Premiere acoustics and utilizes core components of the line. The new proprietary SecureFit™ two-piece modular installation system creates a more robust, stable acoustic platform for the speakers and enables a quick and easy one-personal installation solution.

From small residential systems to large commercial installations, Klipsch Pro Series Landscape series speakers are designed to make any installation job quick and easy. The all-weather lineup offers custom installers the unique ability to select between low impedance and 70v/100v installations, while custom, wide dispersion Tractrix® horn loaded tweeters offer the dynamic, powerful sound of a premium, high-performance home theater system in outdoor living spaces. Two burial subwoofers in the lineup provide clean, musical low frequencies with a minimal footprint.

Klipsch will also showcase two DSP amplifiers, the KDA-500 and KDA-1000, broadening the brand's world-class audio applications, and offering unprecedented performance with new and existing Klipsch custom installation products.

In addition, two new shallow depth, Ultra-Slim custom installation speaker models will be introduced, allowing installers powerful Klipsch acoustic solutions when working with

minimal space. The speakers feature a fully-enclosed back box that provides exceptional sound isolation and low frequency response.

FOR IMMEDIATE RELEASE

## **KLIPSCH AUDIO ENTERS NEW PRODUCT CATEGORIES WITH HERITAGE SERIES**

**SHANGHAI, China (June 7, 2017)** — Klipsch®, a tech-driven audio company, continues its 70<sup>th</sup> anniversary celebration at CES Asia 2017 by debuting premium speaker solutions that combine its legendary Heritage series design and acoustics in innovative form factors at CES Asia in Shanghai, China. These new products address the new ways people access, control and connect to content throughout their living spaces or on the go.

The Heritage Wireless series of powered audio systems blend award-winning Klipsch acoustics, retro mid-century modern design, luxury materials, and latest technologies available today. “We have combined the finest luxury materials, such as real wood veneer, genuine hand-stitched leather, and spun copper switches with the legendary high-performance acoustics and classic design legacy of founder Paul W. Klipsch to deliver superior tactile, visual, and listening experiences,” said Steve Jain, VP and general manager of digital, streaming and portable audio solutions at Klipsch Group, Inc.

Klipsch and Capitol Records, one of the world’s preeminent record companies, have joined forces to celebrate more than seven decades of bringing sound to life. Together, they will expand the Heritage Wireless series by introducing co-branded, special edition models of The Capitol One semi portable tabletop stereo system, The Capitol Three tabletop stereo system, and The Capitol Heresy speakers that feature custom designed grilles and anniversary logos.

Back by popular demand, the redesigned Klipsch Forte III is the most affordable full-range speaker in the iconic Heritage series. The Forte III is handcrafted in Hope, AR and features an elegant design, updated cosmetics, and the latest advancements in acoustic engineering, while maintaining the original charisma that made it so popular in the past.

The Klipsch RF-7 is known for its powerful acoustic performance and furniture-grade wood veneer cabinet that is handcrafted in the USA. Klipsch is reintroducing an enhanced RF-7 III with new aesthetics, styling, and acoustics that deliver detailed and smooth sound.

Klipsch Heritage Headphones embody the craft-built qualities and acoustics of premium loudspeakers in an artisan package. Choice woods and machined copper accents, along with supple leather details provide an elevated experience for discerning audiophiles. Fitted with biocellulose drivers, each construct uses free-edge diaphragms like a true hi-fi speaker driver. They deliver detail and clarity at both ends of the sound spectrum, and provide an exceptional tactile experience.
