Klipsch[®]

A VOXX INTERNATIONAL COMPANY

FOR IMMEDIATE RELEASE

Klipsch Audio at International CES 2017
Legendary sound intersects smart design

INDIANAPOLIS, IND. (January 4, 2017) — Klipsch[®], a tech driven audio company, continues its 70th anniversary celebration at CES[®] 2017 by debuting its legendary sound in smartly designed products. Klipsch is focused on delivering innovative audio products consumers would be proud to have in their homes. This CES showcase will be one of the largest debuts of new products in Klipsch's history.

"The Klipsch showcase of products illustrates our commitment to incorporating luxury materials, such as real wood veneer and tactile spun copper switches and knobs, blended with the acoustics and the classic design legacy of Paul W. Klipsch," said Paul Jacobs, president and CEO of Klipsch Group.

The Heritage Wireless collection is expanding and Klipsch will introduce two table top speakers and a pair of powered floorstanding speakers, named The Fifteens. "When designing The Fifteens, we took cues from the 1930's and the result is a pair of romantically nostalgic floorstanding speakers with a distinct wide baffle and large format sound," said Steve Jain, VP and general manager, Klipsch. "The Fifteens completely redefine the audiophile experience with a design nod to the past and the latest technology." Also on display in the Heritage Wireless collection, attendees will find The One, The Three and The Sixes. Visit Klipsch in the Las Vegas Convention Center's **Central Hall, booth #13528** to see and hear the Heritage Wireless family members firsthand.

The newest member to the Heritage family, the Forte III, also will be on display. Incorporating luxury materials such as real wood veneer and a lambswool grille, the Forte III blends the acoustics and classic design legacy of Paul W. Klipsch with the latest technologies available today. The floorstanding speakers provide clean, multi-dimensional sound and true, full-range performance with a narrow profile.

Other must-see products include the new Heritage range of headphones consisting of multiple models with a top of the line product that incorporates Klipsch's first semi-open headphone design. "In a sea of plastic headphone options, Klipsch Heritage Headphones are crafted from machined metal, milled wood, and hand-selected full grain cow hide. Klipsch Heritage headphones deliver the style and legendary sound of Klipsch's 70 year legacy," said Steve Jain, VP and general manager, Klipsch.

Making their CES debut, and designed with power, performance and simplicity in mind, the R-25PF powered floorstanding speakers cater to the way people access and listen to music, while maintaining the core Klipsch design and acoustic principles. The Klipsch R-25PF's were designed for simple set-up, directly to a turntable, television, computer or wireless device. Its integrated phono pre-amp, *Bluetooth*[®] wireless technology, digital optical, analog RCA, and USB audio inputs, make it a versatile audio solution.

Klipsch introduces new Reference subwoofers, controlled via the easy-to-use Klipsch LowControl™ app for iPhone[®] and Android. The app allows the user in-room tuning performance to fully customize the listening experience. Simple yet robust, the sub tuning is complete with volume, phase, high pass and EQ customization. The new Klipsch Reference subwoofers feature night, cinema and music listening modes for quick and easy adjustments while enjoying your favorite content.

Expanding the Klipsch Stream Wireless Multi-Room ecosystem, Klipsch introduces the Powergate Max. The Powergate Max features real wood, a 180W digital amplifier with 192kHz / 24-bit ESS DACs and is turntable ready, moving magnet and moving coil. The Klipsch Stream system features DTS Play-Fi[®] technology for high resolution wireless multi-room streaming over a home Wi-Fi network. Check out all the Stream products at the Klipsch CES booth.

For more information about Klipsch at CES, please visit the Klipsch booth in the **Central Hall, #13528** or Klipsch.com/CES for product information and a digital press kit.

A VOXX INTERNATIONAL COMPANY

Klipsch and Capitol Partner for Anniversaries *Celebrating over 70 years of music*

INDIANAPOLIS (January 4, 2016) — [Klipsch](#), a tech-driven audio company, announced today an anniversary partnership with Capitol Records, one of the world's preeminent record companies and the first label established on the West Coast. Klipsch is celebrating 70 years of bringing the power, detail and emotion of the live music experience into homes as Capitol Records celebrates 75 years of extraordinary music luminaries past and present.

"Klipsch and Capitol Records, both celebrating over seven decades, is a natural partnership of two iconic brands and pays tribute to the important role music plays in our lives," said Paul Jacobs, president and CEO of Klipsch. "Music is timeless and unites people across cultures. Our global brands are committed to the enduring power of music and the emotion it evokes. We look forward to continuing our heritage and legacy around this great art form."

The partnership includes special edition co-branded Klipsch and Capitol Records Heritage Wireless products which feature mid-century modern design, legendary Klipsch sound and the latest technology. The Capitol One, the Capitol Three and the Capitol Heresy speakers will be available through select retailers beginning in 2017 and include a special edition cobranded anniversary logo and select materials.

Capitol Records year-long 75th anniversary celebration includes extensive projects that pay tribute to Capitol artists spanning the past eight decades and shine a spotlight on their historic contributions to music and popular culture. Part of the celebration includes The Capitol Records 75th Anniversary Collection which features albums, selected based on different eras and musical genres, best sellers, influential works and lesser known gems.

The Capitol One, designed to be a semi-portable tabletop speaker, is a 2.1 stereo system featuring *Bluetooth*® wireless technology and analog audio input connections. The product is bi-amplified and professionally tuned by Klipsch engineers for superior sound. The One features two 2 ¼" full range drivers and a 4.5" woofer to deliver a crystal clear acoustic performance with great bass. The One comes with an 8-hour rechargeable battery and is available in two species of real wood veneer, walnut or ebony.

The Capitol Three, a slightly larger sized stereo tabletop system, features two 2 ¼" full range drivers, a 5 ¼" long-throw woofer and dual opposed 5 ¼" passive radiators to deliver enhanced bass and includes a 192kHz / 24-bit digital to analog converter for audiophile resolution. Part of the Klipsch Stream Wireless Multi-Room Audio system (featuring DTS® Play-Fi™ technology), The Three can receive audio input from Wi-Fi, *Bluetooth*® wireless technology, Analog (3.5 mm miniplug and RCA), phono pre-amp, and USB Type B audio. The Klipsch Stream app, available for iPhone® and Android™, allows consumers to control the system's operations from their phone to enjoy popular music services, internet radio and their personal listening libraries. The Three is available in walnut or ebony.

The Capitol Heresy, handmade in Hope, Arkansas, with custom anniversary finishes, delivers smooth, dynamic and low distortion sound. The Heresy, first introduced in 1957, started out as a

compact center channel speaker to accompany the [Klipschorn®](#) in three-speaker stereo arrays. Today, the new Heresy has a more powerful woofer, a bi-wire network, and a titanium diaphragm tweeter with a larger magnet assembly.
