GALLERY®

## MINIMALIST ONLY IN APPEARANCE

Introducing Klipsch Gallery®. This sonic masterpiece aligns flat with your screen and delivers sound that's anything but.

## TECHNOLOGY GUIDED BY PRINCIPLES

Don't let the modern design fool you. Though slim and lightweight, the new Klipsch Gallery Series still packs a deep, horn-loaded sound experience. After all, it is from Klipsch.

## G-28

### REINFORCE THE OPPOSITE WALL

Klipsch Gallery hangs like a graceful work of art and tests the structural integrity of all that surrounds it.

The symmetrical design that includes the proprietary Klipsch Tractrix® Horn creates a 90° by 90° dispersion pattern, greatly expanding the listening area and providing pinpoint imaging. That same technology enables Klipsch Gallery to mount both vertically and horizontally and own any room.

## G-16

### BEAUTIFULLY SLIM. HARDLY INVISIBLE.

Each speaker can be wall mounted or placed on its included glass base.

In keeping with its strikingly simple appearance, channeled wire management tastefully tucks any distractions out of sight. And the acoustically invisible grille—at half the thickness of a credit card—allows you to make all of your choices based solely on aesthetics. Grille on or off, the sound remains unaltered.

## G-12

### ALL AROUND YOU

Klipsch Gallery comes in an array of sizes that all play nicely with one another.

The G-12, G-16 and G-28 elegantly interchange to take on the role of left, center, right or surround channel. And the high-gloss, piano black finish complements any and every design scheme, allowing the sound to flow seamlessly from room to room.

**G-42**

**LEAN IN. BACK OFF.**

The G-42—three artful speakers, one flawless cabinet.

One single bar delivers left, center and right channel sound. Even the largest speaker in the series doesn't have to dominate physically in order to leave a lasting impression.
